Editor's Note

Ease of access to information, better communication means, innovation in many fields are some of the advantages of Information Technology. In this issue of Information Technology journal, capstone and thesis in computing project were presented.

A 2D animation for the awareness of 2 neurological conditions are presented, it is entitled, "A Hundred Ways to Say Hello: A 2D Animated short Film". The symptoms and effects were thoroughly discussed and the researcher constructed a unique way to present it through Animation.

Alarm system for fire, flood and earthquake and Flood monitoring system with SMS notification are also included in this journal, which I think in a way are developments that will be very helpful to the people. It is entitled "FFQ: FIRE, FLOOD AND EARTHQUAKE ALARM SYSTEM", the system will alarm the barangay whenever a house with FFQ needs help.

A website with sales and inventory system and Data management and tracing App for a Barangay in Plaridel is another content in this issue. It is entitled "E-COMMERCE WEBSITE WITH SALES AND INVENTORY MANAGEMENT SYSTEM", an E-commerce website which allows Golden Bloom Orchids to conduct business activities online.

The use of RFID as an innovation for gate monitoring system with SMS notification is also presented in the journal. It is entitled "RFID GATE MONITORING SYSTEM FOR BASIC EDUCATION OF BALIUAG UNIVERSITY WITH SMS NOTIFICATION", the system immediately, send a message to the parents/guardians that their child/children had already arrived at the school.

A flood monitoring system entitled "BANTAYBAHA: FLOOD MONITORING SYSTEMWITH SMS NOTIFICATION", is also included in this issue, it is a technologically advanced flood monitoring device that can send SMS notification to the people regarding the flood water level status of the barangay.
